Starlite

HEADLIGHT/VIDEO CAMERA

The Contec headlight/video camera system puts the power of video at the tip of your optics. Capturing

complete surgical procedures on video, it provides vivid color and unmatched clarity through a compact, lightweight camera. Contec's headlight/video camera system is an ideal tool for educational purposes and presentations offering the finest super VHS resolution available in a headlight mounted video system. The 1/3" camera head comes equipped with a 30 mm lens, which, together with the large spot size of the Starlite headlight, delivers full field of view and illumination to the surgical and video recording area.

The **Starlite** Fiber Optic Headlight

- The surgical headlight for your headlight/video camera system. Bright, light and comfortable, the Starlite fiber optic headlight has brought intelligent design to surgical illumination.
- Adjustable spot size and linkage and sterilizable positioning bar offer greater flexibility to meet your needs.
